

TECH TIMES. COMMUNICATION MADE EASY!

Megan Hergenroether, V-Force Elite Gymnastics, Inc

About Team App

Team App (www.teamapp.com) is a platform that enables you to create a customized smartphone app for your Team, Club, League or Governing Body. It's 100% free and takes less than 10 minutes to create your app. Once your Team App is created, members download Team App from the App Store or Google Play, search for your team and request to become a member. Every Team App also includes a website that updates dynamically with your app!

How can Team App help your team?

Team App has many key features that enable any team to communicate with all members and key stakeholders in real-time via their very own app - and it's **FREE!** Create events, send news, upload photos & videos, instant messaging and much more. In addition to this you can use Team App to create real value for your sponsors and help generate revenue for your team.

HOW Team App helped V-force Elite!

Like most gyms, we struggled with getting team information out. We tried emails blasts, calls, set up boxes at the front office and still information was getting lost... THERE HAD TO BE A BETTER WAY! So, I searched and searched and came across Team App. This seemed too good to be true! Everything I needed and more! So, with that said, we launched Team App a few years ago for all competition teams and parent club to help us communicate meet information, schedules, news, events, and even direct links to our region website, club website and USA Gymnastics. This allowed parents to have instant access to all the information. PLUS, it was all in writing!!! Not only did it help us communicate with our team parents but also our staff! On the app, you can send certain messages to specific groups. This was beneficial because there always isn't enough time to go to each one specifically. We especially like the video feature! This allowed us to post new fun drills for the coaches to review to continue their education. Team App is a one stop shop in helping coaches and parents to communicate better. Every sports team needs this app!

COMMUNICATION

Communication can be a real challenge especially between staff, competition teams, and parents. However, strong communication is fundamental to the partnership and to building a sense of relationship between the family and the gym. In these changing times, coaches must continue to develop and expand their skills to maximize effective communication with parents.

This is where Team App came into play!

"It's an easy tool to communicate to everyone at one time. Everything is archived/saved for parents to refer to. It allows parents to communicate to each other through private chats or chat groups without having their contact information. Team APP is easy for everyone to use!"

- Stacy Sundgren
Team parent & Parent club
